The Day of Atonement.

oct. 29, 1857.

The following passage will be found in the sixteenth chapter of the book of Leviticus, commencing at the 29th verse, and continuing to the conclusion of the chap- advanced in the scale of States since 1840 .-

flict your souls, and do no work at all, whether it be one of your own country, or a stranger that sojourneth among you: For on that day shall the priest make an atonement for you, to cleanse you, that ye may be clean from all your sins

It shall be a sabbath of rest unto you, and ye shall afflict our souls, by a statute for ever. And the priest whom he shall anoint, and whom he shall for the time, by her prairie sister, will probably keep consecrate to minister in the priest's office in his father's lead, shall make the atonement, and shall put on the linen growing longer. lothes, even the holy garments.

And he shall make an atonement for the holy sanctuary. and he shall make an atonement for the tabernacle of the congregation, and for the altar; and he shall make an atonement for the priests, and for all the people of the congrega-

And this shall be an everlasting statute unto you, to make an atonement for the children of Israel, for all their sins, once a year. And he did as the LORD commanded Moses. In accordance with this requirement of the Mosiac and rapid growth in the southern seaboard States. Law, the several places of business belonging to our fel-

that the invidious distinction in our State Constitution against the members of this religious denomination is not in accordance with the liberal spirit of the age in which we live. The number of Israelites in North Carolina is very small, and does not, to our knowledge or belief, contain a single man who is an applicant for office of any kind, and therefore the incapacity for holding it is more invidious because wholly gratuitous. Jews pay taxes are liable to perform all civil duties, are competent to vote-to bear testimony in all cases. We do not see any use for their exclusion from office. Even in England old prejudices have been forced to yield to the admission of Mr. Rothschild to a seat in Parliament.

The North Carolinian.

We learn from the Carolinian of the 18th that the editorial connection of Wm. Bow, Esq., with that paper ceased with the issue of the 11th instant, the office having been disposed of to other parties.

It is due to Mr. Bow to say, that under his management the Carolinian has been undeviatingly true to the principles of the Democratic party, to which it has given a warm and efficient support. Mr. B. carries with him to his retirement the respect and esteem of his editorial brethren of both parties.

The older States of the North West, as Ohio, Indiana and Illinois, are fast reaching that point in their history where their progress, instead of being more rapid than that of the other sections of the Union, will probably be slower. The Health of Wilmington.

The annexed correspondence between Captain Fremont, the Superintendent of the Wilmington and Weldon R. Road, and Dr. James F. McRee, Jr., Port Physician, will speak for itself. Its publication seems to have been demanded to meet the efforts of parties seeking custom for other lines of railroad by scaring travellers off this, through false representations of the sanitary condition of Wilmington and other points along this line of road. So far as we know, and we may be supposed to know something about it, the country along the line of road from Weldon to Kingsville was never more generally healthy than it is at the present time, nor have we ever seen the roads in better order.

THE ATLANTIC TELEGRAPH.—We have private adices from London by Vanderbilt, which state that Prof. Hughes would have his machines in readiness to work the cable on or about the 8th inst., on which day the Atlantic Company expected to despatch a special steamer to Trinity Bay, with one of Prof. Hughes' assistants | without stipulation as to remuneration. on board. We may, therefore, hope to see the cable in complete working order on or about the 25th inst. In answer to the theorizing of many respecting the impos- nese, says: sibility of working the cable by the Hughes system, it is impossible to say that, with instruments hastily constructed and in many respects very imperfect, Prof. Hughes has transmitted intelligence reliably and continnously through 2,900 miles of the Atlantic Telegraph Cable. This was whilst the cable was at Keyham .-Since then about 2,200 miles of the same cable has been submerged between Ireland and Newfoundland, and with electrical results nearly fifty per cent. (so the Telegraph Company's electricians assert) more favorable than whilst it was coiled at Keyham. Prof. Hughes says unhesitatingly, that he can transmit intelligence through the cable reliably and continuously at the rate

of from three to six words per minute.

SON-IN-LAW OF DR. MITCHELL MURDERED .- Mr. Richard S. Grant, a son-in-law of the late Prof. Mitchell, has been barbarously murdered, not far from his own plantation in the neighborhood of Swartwout, on the Trinity River in Texas. It seems Mr. Grant and several of his neighbors had given notice to a troublesome desperado named Drake, that he must quit that country, 444 and it is supposed that Drake shot him on the 14th ult. 134 on the high road, while entirely unsuspicious of danger. He received two gun shot wounds in the breast, and 32 must have died instantly. DEAR SIR:—I demand, as a right, to know who requested you to say, as you have said in an editorial of your paper, on the 4th inst., that "Judge Breese is not, nor will he be, a candidate for the United States Senate in opposition to Mr. Douglas; and all that has been said in reference to his stumping the State against the Democratic party is without any foundation whatever." The article is artfully prepared, but it will not deceive

> It never has been said in any paper, or elsewhere, by any-body, that I intended to stump the State against the Democratic party; hence your disclaimer was wholly unnecessor ry. You might have sworn, on your friend Casper Thiell's bible, that I never would be found in opposition to the great Democratic party of the nation, whose hardest battles I have helped to fight and win, for more than a quarter of a century. You might take your oath of that without fear.
> But I think, friend Boyakin, your ideas of Democracy and mine differ most essentially. You will pardon me for saying that yours seem to be concentrated in one man, while mine embrace great principles. Yours seem to tend to the disruption and debauchery of that great party; mine, to its

conservatism and purity. Yours, if carried out, will anni hilate it; mine will restore it to its pristine vigor. What position I may consider it my duty to assume in this Wisconsin, Nov. 2, for Congressmen.

IRELAND THE LAND OF PLENTY .- The following harvest report is from Cork, Ireland: "The sickle is already busy on all sides, and a truly golden harvest is falling beneath its stroke. The crops of all kinds are so abundant and so entirely free from even the appearance of disease or failure, that this may be called the first year of plenty since the famine. The yield of all produce is far beyond the measure of the best years we have had for a long time, and the country may at length congratulate itself in the assurance that its trials are at an end. Even the potato seems to have all at once recovered the firmness and sweetness of its best days. In point of

Dr. J. WILLIAMS, Chemist and Pharmaceutist, after studying closely the practice of Drs. Abernethy and J. John son, England and observing the nature of the disease in all its stages, during a sojourn in the Southern and western portion of the United States, where it prevails to a greater extent than elsewhere, procured from South America, cer-

tain roots and herbs, from which he prepared an "Elixir; which, after eighteen years' use in private practice, has prov? ed itself more efficacious in the cure of Dyspepsy, than any medicine that has ever been prepared in any age or any clime, for the same purpose. Having submitted it, with an explanation of its componen to a number of Physicians of Philadelphia, among whom were the late Drs. Joseph Hartshorne, and J. C. Morton, it has received their entire approval, and many of the Medical Faculty are now not only prescribing it for their patients, but are using it themselves personally, and in their families.

As a tonic, it is unequalled, and its properties are of so invigorating a nature, that it is given with perfect safety and success to the most tender infants. The "Elixir" is very gradual, but certain in its action un on the organs of digestion, the increased secretions of the liver, pancreas and mucous membrane of the stomach, and requires that only one dose be taken in twenty-four hours; for confirmed Dyspepsy can only be cured by gradually re-storing the organs of digestion to a healthy state. The great success met with in curing the most aggravated cases of Dyspepsy, accompanied sometimes with a high grade of hy ochondriasis, has established the most unbounded confi

lence in the curative properties of this "Elixir," in corrol oration of which read the following testimonials. ATTESTATION .- We, having used Williams' "Anti-Dys peptic Elixir," with the most perfect satisfaction and success, take great pleasure in recommending it to all persons suffering with Dyspepsy, as we are fully convinced of its most estimable qualities, in restoring the digestive powers, removing all pains and uneasiness, and imparting a healthy
